

# Contractors You're Invited

Tuesday, May 28<sup>TH</sup>  
7-11<sup>AM</sup>

Have Breakfast or a Coffee Break

## VERSATEX<sup>®</sup>

### BUILDING PRODUCTS

Xceeding your Xpectations!

Our XCEED lap siding has exceptional features, such as a unique VZ Drop-Lock that simplifies installation, an IR heat reflective capstock and 16'-0" panels that reduce butt joints. Similar to vinyl siding, but with butt joints secured by a nail hem bracket and screws for a better on the wall appearance.

For over 20 years, VERSATEX has been dedicated to superior quality & performance.

In that tradition, XCEED Siding by VERSATEX has been carefully developed and tested and is backed by a Limited Lifetime Warranty. XCEED is a beautiful and elegant addition to a home's exterior, dormers, or gables. Available in a 4 1/2" reveal lap, in six next generation UV resistant colors.

**VZ DROP LOCK**

3/4" butt height

**X-Siding Tip:**  
XCEED interlocking system features a top down drop 'n lock reducing installation time.

Trim options include 1" pocketed stealth corners, stealth trim, and custom frieze board and custom starter/ skirtboard. S4S trim is ideal due to the soft, textured appearance of XCEED. XCEED is unlike traditional wood sidings that crack, check, and cup over time due to moisture, as well as fiber cement and wood composite sidings that still require paints for protection – **just high aesthetic value with little to no maintenance ever required.**
