HIGH R-VALUE INSULATED RIMBOARD

Cross section of materials

All materials above the foundation are available from National Lumber.

HIGH-Rim

R-11 Assembly

HIGH-Rim Insulated Rimboard consists of two OSB boards and polyurethane foam adhered to create a tightly sealed, **high R-value**, solid R-11 barrier for the perimeter of the beltline.

- Helps your project meet Massachusetts Stretch Energy Code
- Insulates a difficult area in floor construction in one step
- Meets APA PRR 401 for non-structural rimboard
- 3 1/2" thick
- In Stock Depths: 9 1/2", 11 7/8" and 14"
- Convenient pre-assembled 12 foot lengths
